

Founded in September of 2015, GABA APP is a unique multi-vendor marketplace that provides marketing and business solutions for wine and spirit retailers. We are a sales, advertising and marketing platform for vendors to list and sell their inventory in a central place. Our platform allows local stores to widen their reach within the city and at a national level to increase exposure and broaden their selling potential by expanding their business to e-commerce and developing a social media presence. We work directly with retailers to provide a customized experience to meet their newly expanding ecommerce and social media needs. GABA APP is a way for small businesses to share the cost of e-commerce, advertising, & marketing without losing their own unique identity.
